School Year: 2015 – 2019

Bulacan State University

EXPERIENCES

Java Developer – Collabera Digital (SM Retail Inc.)

September 14, 2023 - Present

- Leading the development of REST API to integrate SM Retail Inc's existing REST API for bill's payment and top-up services using Spring Boot, Spring MVC, Spring Security, Spring Data JPA and Maven.
- Automatically documented the REST APIs using Swagger.
- Implemented the use of JWT for authentication
- Develop and updated new and existing reports using Jasper Report
- Modified SM Retail's Inc existing system UI that is JSP and Struts 2

Senior Consultant - Oracle PH Corporation

July 15, 2019 – September 8, 2023

- As an Oracle Revenue Management and Billing (ORMB) Consultant our job is to modify ORMB to match the client's business rules and meet their expectations.
- Financial Services is the main product of our system wherein we provide Health Care Services under ASO structure.
- We were using OUAF, Java, Oracle SQL and JavaScript as the main technologies.
- We were mandated to create a Unit Test Plans so that the Testers from the client side or other Developers in the team will know how to test our deliverables.
- I am also a scrum team developer lead wherein I am the one who took tasks from our onshore lead and distribute them to our scrum team members
- A technical design per user story is also one of the documents that we need to produce.
- We also assist the Clients/Testers whenever they got issue during testing or if there are some production issues.
- We are following the Agile Scrum Methodology for a fast-paced development and an accurate track of our deliverables.
- We are also conducting Boot Camp for our new hires to familiarized them on ORMB and OUAF wherein I am one of the instructors.

Intern – Palm Solutions Inc

August 2018 – November 2018

- Acted as a developer for our operations team.
- Developing admin dashboards (web site) using NodeJs and ReactJs as the main tech stack.
