EXPERIENCES

Senior Consultant - Oracle PH Corporation (July 15, 2019 - Present)

- As an Oracle Revenue Management and Billing (ORMB) Consultant our job is to modify ORMB to match the client's business rules and meet their expectations.
- Financial Services is the main product of our system wherein we provide Health Care Services under ASO structure.
- We are using OUPAF, Java, Oracle SQL and JavaScript as the main technologies.
- We are mandated to create a Unit Test Plans so that the Testers from the client side or other Developers in the team will know how to test our deliverables.
- I am also a scrum team developer lead wherein I am the one who took tasks from our onshore lead and distribute them to our scrum team members
- A technical design per user story is also one of the documents that we need to produce.
- We also assist the Clients/Testers whenever they got issue during testing or if there are some production issues.
- We are following the Agile Scrum Methodology for a fast-pacing development and an accurate track of our deliverables.
- We are also conducting Boot Camp for our new hires to familiarized them on ORMB and OUPAF wherein I am one of the instructors.

Intern – Palm Solutions Inc (August 2018 – November 2018)

- Acted as a developer for our operations team.
- Developing admin dashboards (web site) using NodeJS and ReactJS as the main tech stack.
